

INTRODUCING

Wallart™

**THE EASY WAY TO DECORATE
& TRANSFORM BEDROOMS,
HALLWAYS, DOORS, OFFICES,
GARAGES ... ANYWHERE!**

Using our easy-on/easi-off™ technology we present the fast and easy way to transform blank walls to living art.

Use your own image or choose one of our many themed images to **add your own stamp of individualism to your living and working spaces.**

HOW EASY?

Select your image and theme. We print & deliver in 5 working days. Self install takes approximately one hour for an average wall.

Like us to install? No problem, simply call your account manager and we will arrange at an economical cost. We will discuss your requirements and provide you with a no obligation quote.

Easi-on/easi-off graphics™ are printed on a patented self adhesive material that allows you to place and re-position if needed.

Wallart is easily removable so you can update your graphics at any time.

**TRANSFORM DULL AREAS IN YOUR HOME OFFICE,
ADD A SPLASH OF COLOUR IN HALLWAYS,
MAKE A STATEMENT IN YOUR OFFICE OR
ADD GRAPHICS TO YOUR RETAIL AREA .**

Wallart™

the easy way to transform & restore spaces

1. WHAT FORMAT PHOTOS CAN WE USE?

We recommend uploading a high resolution JPG image - which most digital cameras will output

2. WHAT QUALITY DOES MY PHOTO NEED TO BE?

Photo dimensions: between 3 and 8 mega pixels depending on panel size

File size: between 1 and 10 megabytes

All modern cameras will easily output these file sizes

3. HOW EASY IS MY WALLART™ IMAGE TO INSTALL?

Before you start - make sure your wall is clean... really clean - use a surface spray such as Spray and Wipe®, rinse with clean water and a soft cloth and dry thoroughly. Your print is fitted on to a dry, clean surface. Grab a friend and away you go!

Wallart prints are easier than fitting Contact® - 4 easy steps - measure, trim, peel and fit.

Due to the size of our prints we do recommend 2 people to undertake the installation - its easier to manage a large print with 2 pairs of hands.

STEP 1 Wipe the wall, removing dust and any obvious contaminants.

STEP 2 Unroll the wall mural tiles and lay them down, face up, on a flat surface in the correct order.

STEP 3 For best results, apply the graphic from left to right. Take a panel, peel back the backing sheet roughly 30cm from the top and sharply crease the liner.

STEP 4 Position the graphic on the wall. Each panel has a 25mm overlap ensuring there is no white space between them once installed.

STEP 5 Align the graphic and use finger pressure at the top of the panel to tack it in place.

STEP 6 Smooth from the centre to the right edge and then the centre to the left edge.

STEP 7 Pull the backing paper down as needed, using two hands to pull evenly on both sides.

STEP 8 As you pull down the backing paper, continue smoothing the wall mural from the centre right and left. Repeat to the bottom.

STEP 9 Smooth over the outer 10cm of the entire graphic again, using a small circular motion, to ensure good edge adhesion.

STEP 10 Repeat steps 3-7 for each panel until your wall mural is fully installed.

YOU'RE DONE! Using our easion/easioff™ re-positionable technology, it is possible to remove and re-position the print if need be.

6. WHAT DO I DO IF IT'S ACCIDENTALLY DAMAGED?

If your print is damaged in transit, we will replace it free of charge - Simply photograph the damage - both the print damage and the packaging damage and email to us with your request for a replacement. We do reserve the right to retrieve the damaged product for insurance purposes.

7. DO YOU DO CUSTOM SIZE GRAPHICS?

Yes we do, just send us your wall size and we will happily quote.

8. CAN I HAVE A CEILING MURAL?

Yes you can, your imagination is the limit, walls, doors, windows, mirrors & ceilings can all be decorated with our product

9. HOW LONG WILL MY WALLART™ IMAGE LAST?

Whilst we use UV cured inks to protect against sun damage, we warrant the print out of direct sunlight in an interior situation for 24 months.

10. WHAT DO I CLEAN MY WALLART™ GRAPHIC WITH?

Whilst the print is very robust, and UV cured, it can still be scratched. We recommend the use of warm clean water with a clean cloth. Do not scrub. Do not use an abrasive cleaner like Jif®. Dry with a tea towel.
